

`biolockj.module.implicit.parser` modules parse classifier output to generate OTU tables. Implicit modules are ignored if included in the Config file unless *project.allowImplicitModules=Y*.

This package contains the following sub-packages:

1. `[[module.implicit.parser.r16s]]` modules parse `[[module.classifier.r16s]]` reports.
 2. `[[module.implicit.parser.wgs]]` modules parse `[[module.classifier.wgs]]` reports.
-

ParserModuleImpl

cannot be included in the pipeline run order

Description: Abstract implementation of `ParserModule` that the other modules extend to inherit standard functionality.

Abstract modules cannot be added to a pipeline, but the r16s & WGS sub-packages contain modules that inherit standard parser functionality from this class.
