

biolockj.module.implicit.parser.r16s is a sub package of `[[module.implicit.parser]]`.

Package modules extend [ParserModuleImpl](#) to generate OTU tables from 16S classifier output.

Implicit modules are ignored if included in the Config file unless *project.allowImplicitModules=Y*.

RdpParser

```
(added by BioLockJ) #BioModule biolockj.module.implicit.parser.r16s.RdpParser
```

Description: Build OTU tables from [RDP](#) reports.

Options:

- *rdp.minThresholdScore*
-

QiimeParser

```
(added by BioLockJ) #BioModule biolockj.module.implicit.parser.r16s.QiimeParser
```

Description: Build OTU tables from [QIIME](#) summarize_taxa.py otu_table text file reports.

Options: *none*
